

Claims

[c1] I Claim:

1. A portable "Leg-Less" apparatus for cleaning fish, wherein said apparatus is removably attached to any pil- ing or other vertical column having a diameter greater than 2 inches, said apparatus comprising:
 - (a) a rectangular frame cutting board of wood or mold- able plastics having two Vertical Support Arms arms and two Side Support Boards and twp Rear Support Boards for strength;
 - (b) a nylon rope attaching to the Pole Mounting Hinge Supports, said rope being sufficient in size to allow the station to be tied to vertical supports in excess of 18 inches in diameter;
 - (c) a plurality of stainless steel hinges that attach to the Pole Mounting Hinge Supports to allow the station to ro- tate up for cleaning off waste material and to fold flat for convenient storage;
 - (d) mounting cleat aligned and attached to either side of the Pole Mounting Hinge Supports arms to allow the pre- vious rope to be fastened securely;
 - (e) handle 5/8 inch in diameter that extends between the Pole Mounting Hinge Support arms at the bottom, to

form a carrying handle, said handle is covered with P.V.C. $\frac{3}{4}$ inch;

(f) support plate connected to each Pole Mounting Hinge Support, said support plate which selectively holds said support arms in place for mounting.

(g) the use of stainless steel screws, nuts and bolts for assembly.

(h) a semi-circle cutout on the cutting board to allow for fish waste to be scraped into the water, or into a bucket which can be attached to the handle below the board.
